**Allowable Subject Matter**

1. Responsive to the paper filed on September 2<sup>nd</sup>, 2005.

Claims 1 – 30 are allowed.

2. The following is an examiner's statement of reasons for allowance:

- The references cited for rejections themselves or the combinations cannot be used to fully reject the allowable subject matter.
  - a) References are not specified for simulating a Graphical User Interface (GUI)
  - b) There is no motivation for combining the references, for example, Starr et al. (U.S. Patent No. 6,888,900) with Child et al. (U.S. Patent No. 5,121,475) that the look-up table in reference, Starr et al., is used to simulate Signal-Noise-Ratio (SNR) instead of GUI.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Starr et al. (U.S. Patent No. 6,888,900) discloses a method and system for optimizing coding gain that alters the backsearch buffer length. Parker et al. (U.S. Patent No. 5,781,720) discloses a method for automated testing of both new and revised computer application program which use a Graphical User Interface (GUI). Child et al. (U.S. Patent No. 5,121,475) discloses a
